Задача 634

$$3A \rightarrow 2B + C$$

$$r = 1.8 \frac{\text{MOJIb}}{\text{JI} \cdot \text{c}}$$

Продукт: С

$$r = -\frac{d[A]}{dt} = \frac{3}{2} \frac{d[B]}{dt} = 3 \frac{d[C]}{dt} = 1.8 \frac{\text{MOJIb}}{\text{JI} \cdot \text{C}}$$

Таким образом скорость газофазной реакции по компонентам:

$$\frac{d[A]}{dt} = -r = -1.8 \,\text{MOJIB}/\text{JI} \cdot \text{C}$$

$$\frac{d[B]}{dt} = \frac{2}{3}r = \frac{2}{3} \cdot 1.8 \,\text{MOJIB/}_{\text{JI} \cdot \text{C}} = 1.2 \,\text{MOJIB/}_{\text{JI} \cdot \text{C}}$$

$$\frac{d[C]}{dt} = \frac{1}{3}r = \frac{1}{3} \cdot 1.8 \,\text{moly/}_{\text{JI} \cdot \text{C}} = 0.6 \,\text{moly/}_{\text{JI} \cdot \text{C}}$$
